

Assignment

Assignment tasks:

- Responsive Page using Bootstrap(**Search Result Page, Work page**)
- Custom Script For Search Filter
- Bootstrap modal

General description:

- For Required images, check the given “images” folder.
- Both Pages should behave in a responsive manner till 320px screen.
- For font size refer doc folder.
- For responsive refer doc folder for tablet and mobile view.
- We will use custom script for fix header.

Search Result Page

- On Filter button click there will be filter wrap open.
- On filter wrap “search result” should be button tag.
- Use bootstrap 3 column grid structure for filter wrap.
- Use of range plugin will be explain in next session.

Work Page

- Modal be open on “watch tour button”. For reference you can go through below url:
<https://getbootstrap.com/docs/4.1/components/modal/>
- “Begin your journey” will be “a” tag.
- First try to make simple layout without image.
- If you achieve all of your task then you can go through mention layout by using absolute position.

Use below custom script for fix header:

```
$(window).scroll(function() {  
  
    if ($(window).scrollTop() > 0) {  
        $(".wrapper").addClass('small-header');  
    } else {  
        $(".wrapper").removeClass('small-header');  
    }  
});
```

Use below script for more filter button:

```
$(".more-filters-btn").click(function(){  
    var $this = $(this).closest(".search-panel");  
    $this.find(".more-filters").slideToggle();  
});
```

Note: All jquery tasks to be explained in detail in upcoming sessions.
